### LESTER WOOD DROWNED IN UMBAGOG LAKE

The body of Lester Wood, formerly of Bethel, who has been missing since Tuesday of last week from his work as caretaker of Chandler's Lodge, Umbagog Lake, was discovered floating this Thursday morning by Winfield Howe at B Brook Cove.

He was not missed until Friday when he could not be reached by telephone. Winfield Howe of Bethel, proprietor of a nearby camp, found the Chandler camp locked and later discovered the capsize empty boat. It is stated that Wood was last seen at Errol about 10.30 Tuesday night when he left the Dam for the Chandler place. Campers along the route reported hearing the motor until it was well into the lake when apparently trouble developed. Later the motor was heard again and listeners believed at the time that he continued to a safe landing.

Mr. Wood was born in Winthrop, Aug. 14, 1892, the son of Fred M. and Nettie Kimball Wood. His mother died when he was a very small boy and 35 years ago he came to Bethel to live after his father, married Miss Olive Wheeler. Twenty-three years ago he went to South Paris, where he lived for several years, later returning to this town. For the past year, he has been employed in Upton.

Surviving relatives are his step-mother, Mrs. Fred Wood, Bethel; a daughter, Miss Marlon Wood, Lewiston; two sisters, Mrs. Ruth Putnam, Hawaii, and Mrs. Margaret Smith of Monmouth; an aunt, Mrs. Mary, Stetson, Greene; several nieces, nephews and cousins. Burial will be in the family lot in Winthrop.

### MAGICIAN ENTERTAINS

Harry Brock, known as the "Mystic from Mars," gave a very fine exhibition of magic on June 6th at the Bethel Grange Hall for the benefit of the Bethel town baseball team. The audience was in a very receptive mood and would have gladly witnessed another hour's entertainment. However, the Jitters were becoming jittery, and when the amplified music of famous orchestras was rendered, dancing was enjoyed. Many tickets were sold to folks that were unable to come and this support was certainly appreciated.

## Drivers! When the Sun Goes Down, Slow Down

During what part of the 24-hour day are most persons being killed on our highways?

Statistics show that although most of the automobile traffic is in the daytime, most of the fatalities occur at night. Six out of every ten deaths occur while three out of every four cars are safely garaged for the night. These highly pertinent facts are revealed in "Lest We Regret," the ninth in an annual series of booklets published by The Travelers Insurance Company in the interests of highway safety.

During the period from 1930 through 1937, deaths due to automobile accidents during the hours of darkness increased 54.5%; while fatalities during daylight actually decreased 5.4%.

These facts, the booklet points out, are a challenge to traffic experts to devise physical safeguards which will eliminate some of this night-time slaughter. They are a challenge to public officials to put into force whatever legal restrictions may be necessary to curb these crashes. Most of all, they are a challenge to drivers and pedestrians to double their caution in driving and walking at night.

Highway safety, in a last analysis, will never be achieved through the efforts of a few engineers, public officials and lawmakers. Only the combined efforts of 40,000,000 drivers and 100,000,000 pedestrians will accomplish it.

## Dr. True's Elixir

### WINS NEW PRAISE!

A mother writes: "I am thankful that I have discovered this excellent laxative and round worm expeller for the children. It is so mild and gentle in action."

Mrs. Agnes Quigley, Brighton, Mass.

For 88 years watchful mothers have given their children Dr. True's Elixir

as a laxative and round worm expeller. The following symptoms may indicate the presence of these harmful human parasites: offensive breath, variable appetite, nausea, nervousness, grinding of teeth, starting in sleep, etc.

## 40 YEARS AGO in the NEWS

June 7, 1899

At a meeting of the directors of  
the Bethel Chair Company, held  
last Wednesday, the resignations of  
W. W. Hastings, E. C. Rowe and E.  
C. Rich as directors, were accepted  
and E. L. Tebbets, A. E. Herrick  
and J. M. Philbrook elected to fill  
the vacancies. E. C. Park also sent  
in his resignation as treasurer,  
and Mr. Tebbets was made  
general manager of the business.  
Mr. Barrows is president and sup-  
erintendent of the factory.

A petition numerously signed by  
citizens of Bethel has been filed  
with the county commissioners,  
asking for a change in the location  
of a portion of the county road  
leading from Bethel village down  
the Androscoggin River to Middle  
Intervale. It is desired to have  
the new location leave the present  
road near the farm buildings of O.  
R. Stanley and run thence along the  
intervale lying between the way  
now traveled and the river to a  
point near the Simeon Sanborn  
farm buildings, where it would join  
the present highway. The new  
piece would be about one mile in  
length and would obviate long steep  
hills.

Business is flourishing at the but-  
ter factory. Mr. Abbott says that  
the market has not been as good  
before for five years as it is today.  
Gleed—During the shower Mon-  
day forenoon, the lightning struck  
J. W. Bennett's house in four places.  
But little damage was done  
to the house and the family were  
uninjured.

## "THEY TELL ME"

I was talking with a self-made  
man the other day, or listening to  
him anyway. You see if a fellow  
is a success or thinks he is, he  
takes all the credit for it lots of  
times and seems pretty likely to  
think that all the rest of us might  
have done just as well if we hadn't  
seen so indolent or plain spend-  
thrifts. I suppose it is true that  
these successes do have something  
to feel good about if they find a  
cash balance in their favor when  
they get near the end of the road.  
And it is only natural that they  
should like to crow about it. But  
just the same there are some other  
things to kind of aim at. Money  
is good to have and is quite ne-  
cessary. But there are some folks  
who will never be figured very  
successful who are living lives a  
lot more useful than most of these  
financial successes, and while they  
are doing it I bet they are happier  
than their rich fellowmen. Con-  
trol of money alone never brought  
or bought real affection or respect.  
But a decent regard for the rights

## TWO STRIKES ON HIM BEFORE HE GOES TO BAT

## The SNAPSHOT GUILD

PICTURES IN COLOR

You can now make full-color transparencies with some inexpensive  
miniature cameras—and project them in large size on a home screen,  
bringing out all the beauty and richness of a colorful subject.

In the past few years, many thou-  
sands of amateur camera hobby-  
ists have started taking pictures in  
full color. This spring and summer  
thousands more will take up this  
fascinating form of photography  
using full-color films.

It is hard for some of us who are  
used to black-and-white snapshots,  
to imagine taking a picture in full  
color as easily as in black-and-white.  
Yet these color films enable us to do  
just that. Moreover, the pictures are  
not prints on paper but film trans-  
parencies, ideal for viewing color at  
its best. With simple projection  
equipment, these transparencies can  
be shown on a home screen magni-  
fied to almost any desired size.

Thousands of such color pictures  
are being shown this year at the  
New York World's Fair—projected  
on enormous screens so that each  
picture is enlarged approximately  
50,000 times. Until one sees such an  
exhibition, it is impossible to realize  
of others including a tolerance  
and reasonable sympathy with  
their ideas and ideals, will be  
appreciated by most of us success-  
ful failures. I have found that the  
general run of folks will average  
up about the same—after you get  
to know them they ain't so bad or  
so good as they might be. So while  
a lot of money would be nice, and  
a little is much to be desired, there  
is such a thing as paying too dear  
for it.

Canada's Railroad Mileage  
Canada has more miles of rail-  
road in proportion to its population  
than the United States

how much the presence of color can  
add to photography.

Relatively few of the subjects we  
choose for pictures are lacking in  
color. Count them over—children,  
flowers, scenes about the home, land  
scapes, picnics, and sports events,  
water scenes, sunsets, and the like.  
Study such subjects, and you begin  
to understand how much more life  
and realism they retain when pic-  
tured in full color.

Miniature cameras are used for  
taking these full-color pictures. Un-  
til recently, inexpensive cameras of  
this type were not made, but now  
they are available at prices as low  
as \$14, and suitable for taking pic-  
tures in black-and-white as well as  
in color.

Full-color picture taking will  
spread greatly in the next few years,  
and wide-awake hobbyists will plan  
now to take full advantage of this  
amazing development.

## TRUTH about ADVERTISING

By CHARLES B. ROTH

## WHAT IS ADVERTISING GENIUS?

IN THE early days of advertising there were men who posed in the role of genius. They shrouded advertising with mystery. To portray their part they let their hair grow, wore flowing bow ties, affected a far-away look and muttered mysterious formulae.

Some persons still believe that the ability to advertise a business successfully is like the ability to write poetry—an inborn gift.

It isn't at all. The closer advertising comes to answering some of the needs in the lives of common, ordinary people the more nearly it comes to success.

The only genius needed in advertising is the everyday genius of telling the truth in a simple and understandable way.

A few months ago some of the leaders in the advertising profession were boasting about the results of their work. One of the advertising publications published what they said about themselves.

Writers of some of the largest corporations in the country took part in the discussion. But a little druggist in Florida, spend-

ing just a few dollars in his local newspaper, was able to top all the results of these high-salaried advertising men.

All he did was to know the desires of his customers, and sit down and tell them what he had in a simple, understandable, convincing, conversational way. Here is his advertisement:

**SATURDAY SPECIAL**  
this coupon and 5 cents.  
Will buy a Bigger and Better "Double Dip"

**ICE CREAM SODA**  
Clip this Coupon and bring it with five cents to the

**PARK VIEW DRUG STORE**

This is a perfect advertisement. It offers a wanted service. It offers value. It inspires confidence. It is something people in his neighborhood wanted to read.

It didn't take a genius to write it, but the whole genius of advertising is behind it.

Every day advertisers are publishing similar announcements in the newspapers. These announcements are as much in what is called the public interest as the results of scientific research or study—because they bring the public something it wants to make life better or more interesting or, in the case of Park View Drug, a little more enjoyable.

## GIRL SCOUT NOTES

The G. S. Committee is reminded of the approaching camping season and trying to make it possible for several deserving girls to go to the new Maine Camp.

Four of the committee went to Lake Thompson Friday to inspect the site of the new Lewiston-Auburn Girl Scout Camp. It is beautifully situated in a pine grove with a large Central Building equipped with huge fireplace, piano, victrola and comfortable chairs; adjoining this room is a long dining room with windows on both sides overlooking the lake. The cabins nearby, are large and well built with screened porches. Several new ones are being built. Equipment in the grove for recreation is ready—baseball, swings, open fireplaces, diving board and wharf.

Several girls who are doing fine work in scouting and are about ready to receive the high honor of being First Class Scouts could be recommended for at least one week in Camp. The committee are urging any benevolent person in Bethel who is interested in Girl Scouts to make it possible for our Bethel girls to enjoy the contacts and recreational advantages in a well conducted Scout Camp.

Mrs. Earl Davis is Captain of both the Junior and Senior Troops in Bethel.

Information may be obtained from any member of troop committee—Mabel O'Brien, chairman.

### LOCAL MERCHANT WINS AWARD FOR YEARS OF SELLING

In recognition of 15 years of pleasant dealings with the Goodyear Tire and Rubber Company, J. B. Chapman, local dealer for the big rubber company, has just received a very attractive plaque, which now hangs in a conspicuous place in the dealer's office.

Accompanying the plaque was a personal letter from P. W. Litchfield, president of Goodyear, expressing the company's appreciation of the loyalty maintained by the dealer through the years, along with the hope that the pleasant relations may continue indefinitely. Naturally the local representative of Goodyear feels very proud of the plaque and the letter. The plaque is a work of art, done in bronze, with the name of the dealer and that of Goodyear appearing in raised letters on the lower portion, while in the background are portrayed various modes of transportation—automobile, bus, truck, railway, train, steamship, airplane and airship.

In the center foreground of the plaque are shown the main plant of the Goodyear Tire & Rubber Company and the Goodyear-Zep-pellin Airship Dock, the latter being the largest building in the world without interior supports. There also appears in an attractive arrangement a Goodyear All-Weather Tread tire encircling the Goodyear house flag.

In so effectively symbolizing the progress of transportation facilities the plaque brings to mind the important part Goodyear has played in giving ready stimulus to all, and in this co-operative effort the local dealer has reason to be proud of the fact that he has been, and still is, a participating factor.

## Heat Relief in Farm Kitchen Provided by Electric Roaster

No wonder he smiles in anticipation. Just look at that roaster dinner!

By IRA MILLER

### Rural Electrification Bureau

THE electric range, with its almost unlimited capacity, is the ideal solution to the "hot kitchen" problem. And it is slowly but surely coming into general use on the thousands of electrified farms of this country. At the moment, however, coal, wood and, to a lesser extent, kerosene stoves still are the rule in the majority of farm kitchens. And, as any farm wife will agree, nothing on this earth can be so hot as such stoves on a hot day.

Within the past few years, an appliance—the electric roaster—has made its appearance which, as an adjunct to the old-style range, offers an ideal means of heat relief to those farm wives who have high-line service in their homes. Although the electric roaster will do perfectly every job that comes within its size, it must not be assumed that it will entirely replace the range. But, by doing the heavy baking and cooking with the regular stove early in the morning of a hot day, and with a little careful planning, it is possible to complete the day's cooking, in comfort, with the roaster.

Because it has more than a hundred uses—from baking bread to canning fruit—the electric roaster actually is misnamed. Rather, it really should be called a portable oven for the largest size will accommodate a 20-pound roast, a 15-pound turkey or enough meat and vegetables for six or seven persons. And, in addition, it is provided with insert pans, baking rack, broiling attachment and automatic heat control.

The price of the average popular-size electric roaster (holding over 15 quarts) varies from \$20.00 to \$25.00. Actual tests conducted over a 30-day period show that it consumes one kw.-hr. for each full dinner cooked. At the five-cent rate, this represents a little over one cent per person for the average family of four members. In the savings on fuel and because of reduced meat shrinkage, an electric roaster will pay for itself in a year. And this makes no allowance for its comfort and convenience which, to the harassed farm wife, is beyond price—especially during the hot days of summer and fall when long hours in the kitchen are necessary to prepare dinner and supper for the family and, frequently during harvest, for extra hands.

**Many Have Defective Eyesight**  
Eighty-two out of every 100 persons under 60 years of age, and 23 out of every 100 under 20 years of age, have defective eyesight, studies reveal.

**Jaguars Are Powerful**  
Adult jaguars are six to seven feet long and more powerful than a puma or leopard.

## First To Scoot Across Country

VALENTINE NOEL SWITZER is shown above on the power scooter on which he is making the first round-trip transcontinental scooter tour. He left New York late in May bound for San Francisco, where he will visit the San Francisco Exposition for a few days. He plans to retrace his trip to New York, thus being the first person to cross the country and return on a scooter. This unusual vehicle is powered by a two horsepower motor, carries a trailer along with it and reaches a top speed of thirty-five miles per hour. A one-gallon gasoline tank gives it a cruising radius of approximately 75 miles. Switzer, a native of Dublin, Ireland, is making the trip purely as an adventure and a modern method of seeing the country.
